

About Us

Grayson Tool Company was established in Minden, Nebraska in 1965. The original business consisted of a small metal shop. Since then, Grayson Tool Company has expanded to include all facets of metal manufacturing. A 44,000 square foot manufacturing facility enables Grayson to meet the special requirements of most any metal design.

A distinct advantage of Grayson Tool Company is the diversification of the metal shop. Our prices are not only competitive on a local level, but on a national level as well. As a result of our competitiveness, over fifty percent of our business is from out of state.
